

Description

Job Summary

The Office Hustler team is on the lookout for a talented Developer with significant Python development experience. Working as an integral part of the team you will provide the business with user and player related services in a diverse and dynamic environment.

The successful candidate will need strong, commercially proven experience developing APIs following proven patterns and coding styles and will be expected to work as part of an agile team maintaining the operation of the different platforms and building out new features. They will also be expected to participate in architectural design and planning, as well as contributing to the ongoing documentation of the project and providing support for the other teams using the platform.

If this role feels like a good fit and you are seeking a position in a dynamic and fast paced development environment we would love to hear from you.

Key Deliverables

Developing and maintaining essential systems, providing new ideas to improve and expand the current setup. API management and design with support from other stakeholders for continued efficient running of our services. Ongoing technical management, in conjunction with other internal stakeholders, of Online development projects. Functional requirement gathering and documentation.

Key Stakeholders

Development team: Senior Operations Manager, Development Director.

IT team: Infrastructure Design Manager, Web Infrastructure Manager.

Development studios: Live Game Managers, Producers.
